List of mobile phones on which Mobile Banking works

Mobile banking works on the majority of mobile phones equipped with a browser which uses "cookies", with a data plan (allowing data transfer) or a Wifi connection.

In order to optimise the use of Mobile banking on different mobile phones, we ran tests on the models shown in the list below.
It is the combination of various items outlined (namely: mobile phone brand and model + operating system + version of this OS + mobile phone browser) guarantees its satisfactory operation.
This list will be continuously updated and can of course be added to.

Note: the Opera Mini and Opera Mobile browsers are not supported by the Mobile banking application under any circumstances.

Merk en model	Besturingssysteem van het toestel	Versie van het besturingssysteem	Browser van de mobiele telefoon
BlackBerry 8800	RIM OS	4.5	BlackBerry
BlackBerry 9000 Bold	RIM OS	4.6	BlackBerry
