Neither the Issuer, the Guarantor, nor the Manager takes any responsibility for the information published from time to time by the Index Sponsor regarding the Index.

The Issuer does not intend to provide post-issuance information regarding the Underlying (including information about corporate actions or other events affecting the underlying and adjustments or substitutions to the underlying resulting therefrom), except if required by any applicable laws and regulations.

The Ethical Europe Equity index (the "**Index**" (Bloomberg: SOLEEE<Index>; Reuters: <SOLEEE>; ISIN code DE000SLA5EE6)) is an index of Structured Solutions AG (the legal name of such entity being expected to change soon into Solactive AG) and is calculated and distributed by Structured Solutions AG. It tracks the price movements in **shares of 30 European companies** that have, according to the Index Sponsor, a potential of high dividend, relatively low historical volatility and pass several corporate social responsibility screens applied by the index advisor. The shares composing the Index are rated by VIGEO (a European label for a social responsibility performance) and are selected by the Index Sponsor based on (i) environmental, social responsibility and ethical criteria and (ii) financial criteria.

The composition of the Index is reviewed and eventually updated every 3 months (or any other frequency as determined by the Index Sponsor from time to time).

The Index is a newly created index that has no historical data. This is a price return index (the dividends of the shares are then not reinvested in the value of the Index) and is published in Euro. The Index is less

diversified than other equity indexes such as the Dow Jones Euro Stoxx 50 or the Stoxx Europe 600.

The Ethical Europe Equity index is published via the price marketing services of Boerse Stuttgart AG and is distributed to all affiliated vendors.

The price of the Ethical Europe Equity index is calculated on each Index Business Day based on the prices on the respective Exchanges on which the Index components are listed. The most recent prices of all Index components are used. Prices of Index components not listed in the Index currency are translated using spot foreign exchange rates quoted by Reuters. Should there be no current price available on Reuters, the most recent price or the trading price on Reuters for the preceding trading day is used in the calculation.

The Ethical Europe Equity index is calculated every Index Business Day from 9:00am to 10:30pm, CET. In the event that data cannot be provided to Reuters or to the pricing services of Boerse Stuttgart AG the Index cannot be communicated and the Calculation Agent will then use the provisions to determine the value of the Index as foreseen under Annex 2 of the Conditions as completed by these Final Terms.

Section D – Risks

Element	Title	
D.2	Key risks regarding the Issuer and the Guarantor	There are certain factors that may affect the Issuer's ability to fulfil its obligations under the Securities issued under the Programme and the Guarantor's obligations under the Guarantee.
		<p>The following is a summary of some of the additional investment considerations relating to the business of BP2F:</p> <ul style="list-style-type: none"> (a) The primary credit protection for Securities issued by BP2F will derive from the guarantees given by BNPPF. (b) BP2F's ability to perform its obligations in respect of the structured return on structured securities may depend on the ability of its hedging counterparties to meet their obligations under any hedge. (c) BP2F's ability to make payments under the Securities may depend on the operating performance of those companies to which the proceeds of the Securities are lent. (d) The financial condition of the operating companies to which the proceeds of the Notes are lent may deteriorate and this may affect BP2F's ability to make payments under the Securities which it issues. (e) During deteriorating or challenging economic conditions BP2F may find it

		<p>The following is a summary of some of the investment considerations relating to the business of BNPPF:</p> <p>(a) Difficult market and economic conditions including, without limitation, concerns regarding the ability of certain countries in the eurozone to refinance their debt obligations, could in the future have a material adverse effect on the operating environment for financial institutions and hence on BNPPF's financial condition, results of operations and cost of risk.</p> <p>(b) Legislative action and regulatory measures taken in response to the global financial crisis may materially impact BNPPF and the financial and economic environment in which it operates.</p> <p>(c) BNPPF's access to and cost of funding could be adversely affected by a further deterioration of the euro zone sovereign debt crisis, worsening economic conditions, a ratings downgrade or other factors.</p> <p>(d) The soundness and conduct of other financial institutions and market participants could adversely affect BNPPF.</p> <p>(e) BNPPF may incur significant losses on its trading and investment activities due to market fluctuations and volatility.</p> <p>(f) A substantial increase in new provisions or a shortfall in the level of previously recorded provisions could adversely affect BNPPF's results of operations and financial condition.</p> <p>(g) BNPPF may generate lower revenues from brokerage and other commission and fee-based businesses during market downturns.</p> <p>(h) BNPPF's hedging strategies may not prevent losses.</p> <p>(i) Significant interest rate changes could adversely affect BNPPF's revenues or profitability.</p> <p>(j) Protracted market declines can reduce liquidity in the markets, making it harder to sell assets and possibly leading to material losses.</p> <p>(k) Notwithstanding BNPPF's risk management policies, procedures and methods, it could still be exposed to unidentified or unanticipated risks, which could lead to material losses.</p> <p>(l) While each of BNPPF's businesses manages its operational risks, these risks remain an inherent part of all of BNPPF's businesses.</p> <p>(m) BNPPF has significant counterparty risk exposure and exposure to systemic</p>

(q) Uncertainty linked to fair value accounting and use of estimates. D.3	Key risks regarding the Securities	<p>There are certain factors which are material for the purposes of assessing the market risks associated with Securities issued under the Programme, including that: Securities (other than Secured Securities) are unsecured obligations.</p> <p>The trading price of the Securities is affected by a number of factors including, but not limited to, (in respect of Securities linked to an Underlying Reference) the price of the relevant Underlying Reference(s), time to expiration or redemption and volatility and such factors mean that the trading price of the Securities may be below the Final Redemption Amount or Cash Settlement Amount or value of the Entitlement.</p> <p>Exposure to the Underlying Reference in many cases will be achieved by the relevant Issuer entering into hedging arrangements and, in respect of Securities linked to an Underlying Reference, potential investors are exposed to the performance of these hedging arrangements and events that may affect the hedging arrangements and consequently the occurrence of any of these events may affect the value of the Securities.</p> <p>Settlement may be postponed following the occurrence or existence of a Settlement Disruption Event and, in these circumstances, the Issuer may pay a Disruption Cash Settlement Price (which may be less than the fair market value of the Entitlement) in lieu of delivering the Entitlement.</p> <p>The occurrence of an additional disruption event or optional additional disruption event may lead to an adjustment to the Securities, cancellation (in the case of Warrants) or early redemption (in the case of Notes and Certificates) or may result in the amount payable on scheduled redemption being different from the amount</p>

Element	Title	
		<p>expected to be paid at scheduled redemption and consequently the occurrence of an additional disruption event and/or optional additional disruption event may have an adverse effect on the value or liquidity of the Securities.</p> <p>The Securities may be redeemed (in the case of Notes and Certificates) in the case of illegality or impracticability and such cancellation or redemption may result in an investor not realising a return on an investment in the Securities.</p> <p>The meetings of Holders provisions permit defined majorities to bind all Holders.</p> <p>Any judicial decision or change to an administrative practice or change to English law or French law, as applicable, after the date of the Base Prospectus could materially adversely impact the value of any Securities affected by it.</p> <p>A reduction in the rating, if any, accorded to outstanding debt securities of the Issuer or Guarantor (if applicable) by a credit rating agency could result in a reduction in the trading value of the Securities.</p> <p>Certain conflicts of interest may arise (see Element E.4 below).</p> <p>The only means through which a Holder can realise value from the Security prior to its Exercise Date, Maturity Date or Redemption Date, as applicable, is to sell it at its then market price in an available secondary market and that there may be no secondary market for the Securities (which could mean that an investor has to exercise or wait until redemption of the Securities to realise a greater value than its trading value).</p> <p>An active secondary market may never be established or may be illiquid and this may adversely affect the value at which an investor may sell its Securities (investors may suffer a partial or total loss of the amount of their investment).</p> <p>In addition, there are specific risks in relation to Securities which are linked to an Underlying Reference (including Hybrid Securities) and an investment in such Securities will entail significant risks not associated with an investment in a conventional debt security. Risk factors in relation to Underlying Reference linked Securities include: exposure to one or more index, adjustment events and market disruption or failure to open of an exchange which may have an adverse effect on the value and liquidity of the Securities.</p>
D.6	Risk warning	<p>See Element D.3 above.</p> <p>In the event of the insolvency of the Issuer or if it is otherwise unable or unwilling to repay the Securities when repayment falls due, an investor may lose all or part of his investment in the Securities.</p> <p>If the Guarantor is unable or unwilling to meet its obligations under the Guarantee when due, an investor may lose all or part of his investment in the Securities.</p>
