Euro Medium Term Note Programme

Public offering in Belgium, in the Netherlands and in Luxembourg

Subscription period: from 28 January 2006 to 24 February 2006 included save in case of early termination due to oversubscription or to material changes in market conditions

In case of early closing of the subscription period due to an oversubscription or a material modification of the market conditions as determined by the Dealer or the Issuer at its only discretion, the allocation of the Notes will be made on the basis of objective allocation criteria as follows: subscriptions will be treated in the chronological order of their receipt and, if necessary, the amount of the last subscriptions received shall be reduced proportionally in order to correspond to the total amount of the Notes that will be issued. Each payment made in relation to the subscription of the Notes which is not allocated shall be reimbursed within 7 TARGET Settlement Days after the payment date and the holders cannot claim any interest on these payments.

PROSPECTIVE INVESTORS AND PURCHASERS SHOULD CONSIDER THE INVESTMENT CONSIDERATIONS SET FORTH UNDER THE SECTION "RISK FACTORS" OF THE BASE PROSPECTUS AND UNDER ITEM 8 OF THE PART B OF THE FINAL TERMS.

PART A - CONTRACTUAL TERMS

Terms used herein shall be deemed to be defined as such for the purposes of the Conditions set forth in the Base Prospectus dated 3 November 2005 which constitute a base prospectus for the purposes of the Prospectus Directive (Directive 2003/71/EC) (the "**Prospectus Directive**") as supplemented by the Supplement to the Base Prospectus dated 16 January 2006. This document constitutes the Final Terms relating to the issue of Notes described herein for the purposes of Article 5.4 of the Prospectus Directive and must be read in conjunction with such Base Prospectus as so supplemented (together, the "**Base Prospectus**").

Full information on the Issuer and the Notes described herein is only available on the basis of a combination of these Final Terms and the Base Prospectus as supplemented. The Base Prospectus and its Supplement are available for viewing at the website of the Luxembourg Stock Exchange and copies may be obtained from Fortis Luxembourg Finance S.A. at 65, boulevard Grande-Duchesse Charlotte, L-1331, Luxembourg and Fortis Bank nv-sa at Montagne du Parc 3, B-1000 Brussels, the Fiscal Agent (save in the case of X/N Notes), Fortis Banque Luxembourg S.A. at 50 Avenue John F Kennedy, L-2951 Luxembourg and the Paying and

Transfer Agents, Fortis Bank (Nederland) N.V. at Rokin 55, 1012 KK Amsterdam, The Netherlands, Citibank, N.A. at 5 Carmelite Street, London EC4Y 0PA.

These Final Terms do not constitute, and may not be used for the purposes of, an offer or solicitation by anyone in any jurisdiction in which such offer or solicitation is not authorised or to any person to whom it is unlawful to make such offer or solicitation, and no action is being taken to permit an offering of the Notes or the distribution of these Final Terms in any jurisdiction where such action is required.

2. RATINGS

Ratings: The Notes will not be specifically rated. The rating allocated to the Notes issued under the Programme and guaranteed on a Senior Subordinated basis are the following

S & P: A+

Moody's: A1

Fitch: A+

Definitions/additional information:

1) S & P: A+

source : www.standardandpoors.com

A Standard & Poor's issue credit rating is a current opinion of the creditworthiness of an obligor with respect to a specific financial obligation, a specific class of financial obligations, or a specific financial program (including ratings on medium-term note programs and commercial paper programs). It takes into consideration the creditworthiness of guarantors, insurers, or other forms of credit enhancement on the obligation and takes into account the currency in which the obligation is denominated. The issue credit rating is not a recommendation to purchase, sell, or hold a financial obligation, inasmuch as it does not comment as to market price or suitability for a particular investor.

Issue credit ratings are based on current information furnished by the obligors or obtained by Standard & Poor's from other sources it considers reliable. Standard & Poor's does not perform an audit in connection with any credit rating and may, on occasion, rely on unaudited financial information. Credit ratings may be changed, suspended, or withdrawn as a result of changes in, or unavailability of, such information, or based on other circumstances.

Issue credit ratings can be either long term or short term. Short-term ratings are generally assigned to those obligations considered short-term in the relevant market. In the U.S., for example, that means obligations with an original maturity of no more than 365 days—including commercial paper. Short-term ratings are also used to indicate the creditworthiness of an obligor with respect to put features on long-term obligations. The result is a dual rating, in which the short-term rating addresses the put feature, in addition to the usual long-term rating. Medium-term notes are assigned long-term ratings.

Long-Term Issue Credit Ratings

Issue credit ratings are based, in varying degrees, on the following considerations:

- Likelihood of payment—capacity and willingness of the obligor to meet its financial commitment on an obligation in accordance with the terms of the obligation;
- Nature of and provisions of the obligation;
- Protection afforded by, and relative position of, the obligation in the event of bankruptcy, reorganization, or other arrangement under the laws of bankruptcy and other laws affecting creditors' rights.

The issue rating definitions are expressed in terms of default risk. As such, they pertain to senior obligations of an entity. Junior obligations are typically rated lower than senior obligations, to reflect the lower priority in bankruptcy, as noted above. (Such differentiation applies when an entity has both senior and subordinated obligations, secured and unsecured obligations, or operating company and holding company obligations.) Accordingly, in the case of junior debt, the rating may not conform exactly with the category definition.

A: An obligation rated 'A' is somewhat more susceptible to the adverse effects of changes in circumstances and economic conditions than obligations in higher-rated categories. However, the obligor's capacity to meet its financial commitment on the obligation is still strong.

Plus (+) or minus (-): The ratings from 'AA' to 'CCC' may be modified by the addition of a plus (+) or minus (-) sign to show relative standing within the major rating categories.

The rating allocated to the Senior Notes issued under the Programme and guaranteed on a Senior Subordinated basis is “**A+**”.

2) Moody's: A1

source : www.moody.com

Moody's long-term obligation ratings are opinions of the relative credit risk of fixed-income obligations with an original maturity of one year or more. They address the possibility that a financial obligation will not be honored as promised. Such ratings reflect both the likelihood of default and any financial loss suffered in the event of default.

A: Obligations rated A are considered upper-medium grade and are subject to low credit risk.

Moody's appends numerical modifiers 1, 2, and 3 to each generic rating classification from Aa through Caa. The modifier 1 indicates that the obligation ranks in the higher end of its generic rating category; the modifier 2 indicates a mid-range ranking; and the modifier 3 indicates a ranking in the lower end of that generic rating category.

The rating allocated to the Notes issued under the Programme and guaranteed on a Senior Subordinated basis is “**A1**”.

3) Fitch: A+

source : www.fitchratings.com

Fitch's credit ratings provide an opinion on the relative ability of an entity to meet financial commitments, such as interest, preferred dividends, repayment of principal, insurance claims or counterparty obligations. Credit ratings are used by investors as indications of the likelihood of receiving their money back in accordance with the terms on which they invested. Fitch's credit ratings cover the global spectrum of corporate, sovereign (including supranational and sub-national), financial, bank, insurance, municipal and other public finance entities and the securities or other obligations they issue, as well as structured finance securities backed by receivables or other financial assets.

The use of credit ratings defines their function: "investment grade" ratings (international Long-term 'AAA' — 'BBB-' categories; Short-term 'F1' — 'F3') indicate relatively low to moderate credit risk, while those in the "speculative" or "non investment grade" categories (international Long-term 'BB+' — 'D'; Short-term 'B' — 'D') either signal a higher level of credit risk or that a default has already occurred. Credit ratings express risk in relative rank order, which is to say they are ordinal measures of credit risk and are not predictive of a specific frequency of default or loss.

Depending on their application, credit ratings address benchmark measures of probability of default as well relative expectations of loss given default. For example, issuers are typically assigned Issuer Default Ratings that are relative measures of default probability. Similarly, short-term credit ratings give primary consideration to the likelihood that obligations will be met on a timely basis. Securities, however, are rated taking into consideration probability of default and loss given default. As a result, for entities such as corporations security ratings may be rated higher, lower or the same as the issuer rating to reflect expectations of the security's relative recovery prospects, as well as differences in ability and willingness to pay. While recovery analysis plays an important role throughout the ratings scale, it becomes a more critical consideration for below investment-grade securities and obligations, particularly at the lower end of the non-investment-grade ratings scale where Fitch often publishes actual Recovery Ratings, that are complementary to the credit ratings.

Structured finance ratings typically are assigned to each individual security or tranche in a transaction, and not to an issuer. Each structured finance tranche is rated on the basis of various stress scenarios in combination with its relative seniority, prioritization of cash flows and other structural mechanisms.

A: High credit quality. 'A' ratings denote expectations of low credit risk. The capacity for payment of financial commitments is considered strong. This capacity may, nevertheless, be more vulnerable to changes in circumstances or in economic conditions than is the case for higher ratings.

The modifiers "+" or "-" may be appended to a rating to denote relative status within major rating categories.

The rating allocated to the Notes issued under the Programme and guaranteed on a Senior Subordinated basis is "A+".

3. NOTIFICATION

The Luxembourg *Commission de Surveillance du Secteur Financier* ("CSSF") has provided the Dutch Authority for the Financial Markets (Stichting Autoriteit Financiële Markten, the "AFM") and the Banking Finance and Insurance Commission (Commission bancaire, financière et des assurances, the "CBFA") (in its capacity as the competent authority for the purposes of the Prospectus Directive) with a certificate of approval attesting that the Base Prospectus as supplemented has been drawn up in accordance with the Prospectus Directive.

4. INTERESTS OF NATURAL AND LEGAL PERSONS INVOLVED IN THE ISSUE

Please refer to the section "Risk Factors" of the Base Prospectus.

Moreover, potential investors should pay attention to the fact that the Issuer is a subsidiary of Fortis Bank and part of Fortis Group whereas Fortis Bank is guarantor, dealer (on a firm underwriting basis), arranger,

calculation agent, and market maker under the issue of Notes, so that various potential conflicts of interest may arise. The Issuer and Fortis Bank undertake to ensure, for each of such conflict, to act in good faith and to use reasonable efforts to come to a commercially acceptable arrangement for the Noteholders.

Fortis Banque Luxembourg SA (previously named Banque Générale du Luxembourg SA) that will act as fiscal and principal paying agent is also part of Fortis Group.

5. REASONS FOR THE OFFER, ESTIMATED NET PROCEEDS AND TOTAL EXPENSES

| (ii) Estimated net proceeds: | Minimum EUR 5,000,000 and maximum EUR 250,000,000. |
| (iii) Estimated total expenses: | EUR 30,000 (these costs are included in the pricing of the Notes) |

6. *Fixed Rate Notes only* – **YIELD** : Not Applicable

7. *Floating Rate Notes only* - **HISTORIC INTEREST RATES** : Not Applicable

8. PERFORMANCE OF INDEX/FORMULA/OTHER VARIABLE AND OTHER INFORMATION CONCERNING THE UNDERLYING

As described in the section "Risk Factors" of the Base Prospectus, an investment in Notes, the terms of which provide that interest payable is linked to interest rates, either directly or inversely (the "indexed Notes"), entails significant risks that are not associated with investments in a conventional fixed rate or floating rate debt security.

Description of the Notes

The interest on the Notes is linked to (i) the performance of the 10 year Euro Constant Maturity Swap (CMS) Rate and (ii) the development of the difference between such rate ("**EUR 10 Yr CMS**") and the 2 year Euro Constant Maturity Swap Rate ("**EUR 2 Yr CMS**"). Both rates give an indication of the rates at which banks are prepared to lend to each other in the interbank market for the relevant period. Generally speaking, the 10 year rate is supposed to be higher than the 2 year rate because of the longer time horizon and the higher risk associated therewith. The interest on the Notes will depend on, *inter alia*, the difference between the two rates. The higher the difference observed between the two rates (i.e. the 10 year rate minus the 2 year rate) is *greater*, the higher the interest on the Notes will be. From the year N°3, the Interest Rate applicable for each Interest Period, such rate being determined in accordance with the formula specified under item 18 of the Part A of the Final Terms, will be of minimum 2 per cent per annum and of maximum 6 per cent per annum.

Any historical information regarding rates does not necessarily constitute an indication as to the future performance of the relevant rate.

"**CMS 2yr**" means EUR 2 YR CMS which is the mid 2 year Euro Swap Rate quoted on an annual 30/360 day basis versus 6 month Euribor as published on Reuters Page ISDAFIX2, Euribor basis, 11:00AM C.E.T., 2 TARGET Settlement Days prior to the beginning of the Interest Period

"**CMS 10yr**" means EUR 10 YR CMS which is the mid 10 year Euro Swap Rate quoted on an annual 30/360 day basis versus 6 month Euribor as published on Reuters Page ISDAFIX2, Euribor basis, 11:00AM C.E.T., 2 TARGET Settlement Days prior to the beginning of the Interest Period

During the life of the Notes, historical information on CMS 2yr and on CMS 10yr (together the “CMS Rates”), information on the evolution of the CMS Rates and the value of the Notes can be obtained from the Paying Agents.

The graphs hereunder show the evolution of the CMS 2yr and the CMS 10yr from 4 January 1999 till 20 January 2006 (source Bloomberg). On 20 January 2006 the value of the CMS 2yr was 3.0559% and the value of the CMS 10yr was 3.5160%.
