An investment in the Notes involves certain risks. Prospective investors should carefully consider the risk factors included in the Base Prospectus and any complementary risk considerations included in these Final Terms prior to investing in the Notes. Each prospective investor should also carefully consider the tax considerations relating to the Notes included in the Base Prospectus and any other up-to-date tax considerations that would be relevant for such prospective investor.

Moreover, prospective investors and purchasers of Notes must inform themselves about all the relevant applicable and up-to-date restrictions, including but not limited to, selling and transfer restrictions relating to the Notes, prior to investing in the Notes.

Each prospective purchaser of Notes must determine his investment decision based on its own independent review of the information included in the Base Prospectus and in this Final Terms.

Risk Warning

Investors should be aware that the Notes are issued in NOK and are as such subject to exchange rate risk for an investor who has to convert another currency into NOK to purchase the Notes. Investors should be aware that as a result of such risk they may receive at maturity an amount in NOK that, if converted in Euro by the investor, has a lower value than the initially invested amount. The same risk applies to the interest payments made in NOK that are exposed to the exchange rate risk (if converted in Euro by the Noteholder, the amount received will depend on the exchange rate on the conversion date).

2. RATINGS

Ratings: The Notes to be issued have been rated:

S & P: AA neg

Moody's: A1 st

Fitch: A+ st

S&P: AA

AA: An obligation rated 'AA' differs from the highest-rated obligations only in small degree. The obligor's capacity to meet its financial commitment on the obligation is very strong.

Plus (+) or minus (-)

The ratings from 'AA' to 'CCC' may be modified by the addition of a plus or minus sign to show relative standing within the major rating categories.

Moody's: A1:

A : Obligations rated A are considered upper-medium grade and are subject to low credit risk.

Moody's appends numerical modifiers 1, 2, and 3 to each generic rating classification from Aa through Caa. The modifier 1 indicates that the obligation ranks in the higher end of its generic rating category; the modifier 2 indicates a mid-range ranking; and the modifier 3 indicates a ranking in the lower end of that generic rating category.

Fitch: A+

A: High credit quality.

'A' ratings denote expectations of low default risk. The capacity for payment of financial commitments is considered strong. This capacity may, nevertheless, be more vulnerable to adverse business or economic conditions than is the case for higher ratings.

The modifiers "+" or "-" may be appended to a rating to denote relative status within major rating categories. Such suffixes are not added to the 'AAA' Long-term rating category, to categories below 'CCC', or to Short-term ratings other than 'F1'. (The +/- modifiers are only used to denote issues within the CCC category, whereas issuers are only rated CCC without the use of modifiers.)
