7. **PERFORMANCE OF RATES OF EXCHANGE/INFLATION INDEX/FOREIGN EXCHANGE (FX) RATE] – EXPLANATION OF EFFECT ON VALUE OF INVESTMENT AND ASSOCIATED RISKS AND OTHER INFORMATION CONCERNING THE UNDERLYING**

The Interest on these Notes for the Years 1 to 3 is a 2.50 per cent Fixed Rate.

The interest on these Notes for the Years 4 to 6 is linked to the development of the difference between the 10 year USD Constant Maturity Swap (CMS) Rate (“**USD CMS 10 Yr**”) and the 2 year USD Constant Maturity Swap (CMS) Rate (“**USD CMS 2 Yr**”). Both rates give an indication of the rates at which banks are prepared to lend to each other in the interbank market for the relevant period. Generally speaking, the 10 year rate is supposed to be higher than the 2 year rate because of the longer time horizon and the higher risk associated therewith. The interest on the Notes will depend on, *inter alia*, the difference between the two rates. The higher the difference observed between the two rates (i.e. the 10 year rate minus the 2 year rate is *greater*), the higher the interest on the Notes will be. From the year 4, the Interest Rate applicable for each Interest Period, such rate being determined in accordance with the formula specified under item 17 of the Part A of the Final Terms, will be of minimum 0 per cent per annum and of maximum 4.5 per cent per annum.

Any historical information regarding rates does not necessarily constitute an indication as to the future performance of the relevant rate.

“**USD CMS 2Y**” means USD 2 YR Swap Rate (quoted on a semi-annually, 30/360 day basis) versus 3 month USD Libor (quoted on a quarterly, Act/360 basis) as published on Reuters Page ISDAFIX1, at 11:00 AM New York Time, fixed 2 days on which commercial banks and foreign exchange markets settle payments and are open for general business (including dealing in foreign exchange and foreign currency deposits) in New York prior to the end of annual Interest Period.

“**USD CMS 10Y**” means USD 10 YR Swap Rate (quoted on a semi-annually, 30/360 day basis) versus 3 month USD Libor (quoted on a quarterly, Act/360 basis) as published on Reuters Page ISDAFIX1, at 11:00 AM New York Time, fixed 2 days on which commercial banks and foreign exchange markets settle payments and are open for general business (including dealing in foreign exchange and foreign currency deposits) in New York prior to the end of the annual Interest Period.

B.19/B.2	Domicile/ legal form/ legislation/ country of incorporation	The Guarantor is incorporated as a public company with limited liability (<i>société anonyme/naamloze vennootschap</i>) under the laws of Belgium with its registered office at 1000 Brussels, Montagne du Parc 3 and is a credit institution governed by the Belgian Banking Law.
B.19/B.4b	Trend information	<p>Macroeconomic environment</p> <p>Market and macroeconomic conditions affect BNPPF's results. The nature of BNPPF's business makes it particularly sensitive to market and macroeconomic conditions in Europe, which have been at times challenging and volatile in recent years.</p> <p>In 2015, the global economic activity remained sluggish. Activity slowed down in emerging countries, while a modest recovery continued in developed countries. The global outlook is still impacted by three major transitions: the diminished economic growth in China, the fall in prices of energy and other commodities, and an initial tightening of US monetary policy in a context of resilient internal recovery, while the central banks of several major developed countries</p>

		<p>are continuing to ease their monetary policies. For 2016, the International Monetary Fund (IMF) is forecasting the progressive recovery of global economic activity⁽³⁾ but with low growth prospects on the medium term in developed and emerging countries.</p> <p>While the exposure of the BNP Paribas Group in emerging countries is limited, the vulnerability of these economies may generate disruptions in the global financial system that could affect the BNP Paribas Group (including BNPPF) and potentially alter its results.</p> <p>In numerous emerging economies, an increase in foreign currency commitments was observed in 2015, while the levels of indebtedness (both in foreign and local currencies) are already high. Moreover, the prospects of a progressive hike in key rates in the United States (first rate increase decided by the Federal Reserve in December 2015), as well as heightened financial volatility linked to the concerns regarding growth in emerging countries, have contributed to the stiffening of external financial conditions, capital outflows, further currency depreciations in numerous emerging countries and an increase in risks for banks. This could lead to the downgrading of sovereign ratings.</p>
		<p>Given the possible standardisation of risk premiums, there is a risk of global market disruptions (rise in risk premiums, erosion of confidence, decline in growth, postponement or slowdown in the harmonisation of monetary policies, drop in market liquidity, problem with the valuation of assets, shrinking of the credit offering, and chaotic de-leveraging) that would affect all banking institutions.</p> <p>The continuation of a situation with exceptionally low interest rates could promote excessive risk-taking by certain financial players: increase in the maturity of loans and assets held, less stringent loan granting policies, increase in leverage financing.</p> <p>Some players (insurance companies, pension funds, asset managers, etc.) entail an increasingly systemic dimension and in the event of market turbulence (linked for instance to a sudden rise in interest rates and/or a sharp price correction) they may decide to unwind large positions in an environment of relatively weak market liquidity.</p> <p>Such liquidity pressure could be exacerbated by the recent increase in the volume of assets under management placed with structures investing in illiquid assets.</p> <p><i>Laws and Regulations Applicable to Financial Institutions.</i></p>

Section D – Risks

Element	Title	
D.2	Key risks regarding the Issuer and the Guarantor	<p>In purchasing Notes, investors assume the risk that the relevant Issuer and/or, if BP2F is the Issuer, the Guarantor, may become insolvent or otherwise be unable to make all payments due in respect of the Notes or under the guarantee. In the event of the insolvency of BNPPF or BP2F, as applicable or if it is otherwise unable or unwilling to repay the Notes when repayment falls due, an investor may lose all or part of his investment in the Notes.</p> <p>There is a wide range of factors which individually or together could result in the relevant Issuer and the Guarantor, where applicable, becoming unable to make all payments due in respect of the Notes. It is not possible to identify all such factors or to determine which factors are most likely to occur, the Issuers and the Guarantor may not be aware of all relevant factors and certain factors which they currently deem not to be material may become material as a result of the occurrence of events outside the Issuer's and/or the Guarantor's control. The Issuers and/or the Guarantor have identified a number of factors which could materially adversely affect their businesses and ability to make payments due under the Notes. These factors include:</p> <p><i>BNPPF/the Guarantor:</i></p> <p>The following is a summary of some of the investment considerations relating to the business of BNPPF:</p> <ul style="list-style-type: none"> (a) Difficult market and economic conditions including, without limitation, concerns regarding the ability of certain countries in the eurozone to refinance their debt obligations, could in the future have a material adverse effect on the operating environment for financial institutions and hence on BNPPF's financial condition, results of operations and cost of risk. (b) Legislative action and regulatory measures taken in response to the global financial crisis may materially impact BNPPF and the financial and economic environment in which it operates. (c) BNPPF's access to and cost of funding could be adversely affected by a further deterioration of the euro zone sovereign debt crisis, worsening economic conditions, a ratings downgrade, increases in credit spreads or other factors.

		<p>(d) The prolonged low interest rate environment carries inherent systematic risks.</p> <p>(e) The soundness and conduct of other financial institutions and market participants could adversely affect BNPPF.</p> <p>(f) BNPPF may incur significant losses on its trading and investment activities due to market fluctuations and volatility.</p> <p>(g) A substantial increase in new provisions or a shortfall in the level of previously recorded provisions could adversely affect BNPPF's results of operations and financial condition.</p> <p>(h) BNPPF may generate lower revenues from brokerage and other commission and fee-based businesses during market downturns.</p> <p>(i) BNPPF's hedging strategies may not prevent losses.</p> <p>(j) Significant interest rate changes could adversely affect BNPPF's net banking income or profitability.</p> <p>(k) Protracted market declines can reduce liquidity in the markets making it harder to sell assets and possibly leading to material losses.</p> <p>(l) BNPPF is subject to extensive and evolving regulatory regimes in the countries and regions in which it operates.</p> <p>(m) Notwithstanding BNPPF's risk management policies, procedures and methods it could still be BNPPF exposed to unidentified or unanticipated risks, which could lead to material losses.</p> <p>(n) While each of BNPPF's businesses manages its operational risks, these risks remain an inherent part of all of the BNPPF's businesses.</p> <p>(o) BNPPF has significant counterparty risk exposure and exposure to systemic risks.</p> <p>(p) BNPPF's competitive position could be harmed if its reputation is damaged.</p> <p>(q) An interruption in or a breach of BNPPF's information systems may result in material losses of client or customer information, damage to BNPPF's reputation and lead to financial losses.</p> <p>(r) Litigation or other proceedings or actions may</p>
--	--	--

		<p>adversely affect BNPPF's business, financial condition and results of operations.</p> <p>(s) Uncertainty linked to fair value accounting and use of estimates.</p> <p>(t) A deterioration of the credit rating of BNP Paribas of its debt quality could adversely affect BNPPF.</p> <p>(u) Unforeseen external events can interrupt BNPPF's operations and cause substantial losses and additional costs.</p> <p>(v) BNPPF may incur substantial fines and other administrative and criminal penalties for non-compliance with applicable laws and regulations, and may also incur losses in related (or unrelated) litigation with private parties.</p> <p>(w) Intense competition in the financial services industry could adversely affect BNPPF revenues and profitability.</p> <p>(x) Adjustments to the carrying value of BNPPF's securities and derivatives portfolios and BNPPF's own debt could have an impact on its net income and shareholders' equity.</p> <p>(y) The expected changes in accounting principles relating to financial instruments may have an impact on BNPPF's balance sheet and regulatory capital ratios and result in additional costs.</p> <p>(z) Risks related to the implementation of BNPP Group's strategic plans.</p> <p>BP2F:</p> <p>The following is a summary of some of the additional investment considerations relating to the business of BP2F:</p> <p>(a) The primary credit protection for Notes issued by BP2F will derive from the guarantees given by BNPPF.</p> <p>(b) BP2F's ability to make payments under the Notes may depend on the operating performance of those companies to which the proceeds of the Notes are lent.</p> <p>(c) BP2F's ability to perform its obligations in respect of the structured return on structured securities may depend on the ability of its hedging counterparties to meet their obligations under any hedge.</p>
--	--	---

		<p>(d) The financial condition of the operating companies to which the proceeds of the Notes are lent may deteriorate and this may affect BP2F's ability to make payments under the Notes which it issues.</p> <p>(e) During deteriorating or challenging economic conditions BP2F may find it difficult to raise further finance.</p> <p>(f) Transfer pricing tax rules in Luxembourg generate additional costs, which may vary from time to time.</p>
<p>D.3</p>	<p>Key risks regarding the Notes</p>	<p>There are certain factors which are material for the purposes of assessing the market risks associated with Notes issued under the Programme, including, without limitation, that:</p> <p>the Notes may not be a suitable investment for all investors,</p> <p>investors may be exposed to exchange rate changes and exchange controls where the Notes are not payable in an investor's home currency,</p> <p>any redemption amount of the Notes may not be equal to the principal amount of the Notes,</p> <p>the trading price of the Notes is affected by a number of factors including, but not limited to, the price of the relevant underlying reference(s), time to expiration or redemption and volatility and such factors mean that the trading price of the Notes may be below the Final Redemption Amount,</p> <p>the only means through which a holder can realise value from the Notes prior to its Maturity Date is to sell it at its then market price in an available secondary market and that there may be no secondary market for the Notes (which could mean that an investor has to exercise or wait until redemption of the Notes to realise a greater value than its trading value),</p> <p>purchasing Notes as a hedge instrument may not be effective,</p> <p>certain conflicts of interest may arise (see Element E.4 below),</p> <p>actions taken by the Calculation Agent may affect the Notes any may give rise to conflicts of interest,</p> <p>holders have no ownership interest in or claim against any underlying reference,</p> <p>Notes including leverage involve a higher level of risk and whenever there are losses on such Notes those losses may</p>

		<p>be higher than those of a similar security which is not leveraged,</p> <p>expenses and taxes may be payable in respect of the Notes,</p> <p>the Notes may be redeemed in the case of illegality or force majeure and such cancellation or redemption may result in an investor not realising a return on an investment in the Notes,</p> <p>the Global Notes are held by or on behalf of the clearing systems, therefore investors will have to rely on their procedures for transfer, payment and communication with the Issuer and the Guarantor,</p> <p>The Issuer and the Guarantor will discharge their payment obligations under the Notes in global/dematerialised form by making payments to the relevant common depository/safekeeper for the relevant clearing system for distribution to their account holders.</p> <p>The Issuer and the Guarantor will have no responsibility for the proper performance by the clearing systems relating to payments made in respect of, the Notes within any relevant clearing system,</p> <p>the meetings of holders provisions permit defined majorities to bind all holders,</p> <p>the Notes may have a minimum trading amount and if, following the transfer of any Notes, a holder holds fewer Notes than the specified minimum trading amount, such holder will not be permitted to transfer their remaining Notes prior to expiration or redemption, as applicable, without first purchasing enough additional Notes in order to hold the minimum trading amount, a holder who holds less than the minimum trading amount may be adversely affected if definitive Notes are issued</p> <p>a reduction in the rating, if any, accorded to outstanding debt securities of the Issuer or Guarantor (if applicable) by a credit rating agency could result in a reduction in the trading value of the Notes,</p> <p>any judicial decision or change to an administrative practice or change to English law after the date of the Base Prospectus could materially adversely impact the value of any Notes affected by it,</p> <p>exposure to the underlying reference in many cases will be achieved by the relevant Issuer entering into hedging arrangements and, in respect of Notes linked to an underlying reference, potential investors are exposed to the performance of these hedging arrangements and events that</p>
--	--	---

		<p>may affect the hedging arrangements and consequently the occurrence of any of these events may affect the value of the Notes,</p> <p>the Notes may be subject to optional redemption by the Issuer which is likely to limit their market value,</p> <p>the occurrence of an additional disruption event or optional additional disruption event may lead to an adjustment to the Notes, or early redemption or may result in the amount payable on scheduled redemption being different from the amount expected to be paid at scheduled redemption and consequently the occurrence of an additional disruption event and/or optional additional disruption event may have an adverse effect on the value or liquidity of the Notes.</p> <p>In certain circumstances holders may lose the entire value of their investment.</p>
