The nature of BP2F's business makes it particularly sensitive to macroeconomic and market conditions in Europe, which have been at times challenging and volatile in recent years.</p> <p>In 2015, the global economic activity remained sluggish. Activity slowed down in emerging countries, while a modest recovery continued in developed countries. The global outlook is still impacted by three major transitions: the slowing economic growth in China, the fall in prices of energy and other commodities, and an initial tightening of US monetary policy in a context of resilient internal recovery, while the central banks of several major developed countries are continuing to ease their monetary policies. For 2016, the IMF¹ is forecasting the progressive recovery of global economic activity but with low growth prospects on the medium term in developed and emerging countries.</p> <p>BP2F is dependent upon BNPPF. BP2F is 99.995% owned by BNPPF and is specifically involved in the issuance of securities such as Notes, Warrants or Certificates or other obligations which are developed, set up and sold to investors via intermediaries, including BNPPF. BP2F enters into hedging transactions with BNPPF and with other entities of the BNP Paribas Group. As a consequence, the Trend Information with respect to BNPPF shall also apply to BP2F. BP2F may also enter into hedging transactions with third parties not belonging to the BNP Paribas Group.</p>

		<p>resilient internal recovery, while the central banks of several major developed countries are continuing to ease their monetary policies. For 2016, the IMF² is forecasting the progressive recovery of global economic activity but with low growth prospects on the medium term in developed and emerging countries.</p> <p>While the exposure of the BNP Paribas Group in emerging countries is limited, the vulnerability of these economies may generate disruptions in the global financial system that could affect the BNP Paribas Group (including BNPP) and potentially alter its results.</p> <p>In numerous emerging economies, an increase in foreign currency commitments was observed in 2015, while the levels of indebtedness (both in foreign and local currencies) are already high. Moreover, the prospects of a progressive hike in key rates in the United States (first rate increase decided by the Federal Reserve in December 2015), as well as heightened financial volatility linked to the concerns regarding growth in emerging countries, have contributed to the stiffening of external financial conditions, capital outflows, further currency depreciations in numerous emerging countries and an increase in risks for banks. This could lead to the downgrading of sovereign ratings.</p> <p>Given the possible standardisation of risk premiums, there is a risk of global market disruptions (rise in risk premiums, erosion of confidence, decline in growth, postponement or slowdown in the harmonisation of monetary policies, drop in market liquidity, problem with the valuation of assets, shrinking of the credit offering, and chaotic de-leveraging) that would affect all banking institutions.</p> <p>The continuation of a situation with exceptionally low interest rates could promote excessive risk-taking by certain financial players: increase in the maturity of loans and assets held, less stringent loan granting policies, increase in leverage financing.</p> <p>Some players (insurance companies, pension funds, asset managers, etc.) entail an increasingly systemic dimension and in the event of market turbulence (linked for instance to a sudden rise in interest rates and/or a sharp price correction) they may decide to unwind large positions in an environment of relatively weak market liquidity.</p> <p>Such liquidity pressure could be exacerbated by the recent increase in the volume of assets under management placed with structures investing in illiquid assets.</p> <p><i>Laws and Regulations Applicable to Financial Institutions.</i></p> <p>Laws and regulations applicable to financial institutions that have an impact on BNPPF have significantly evolved in the wake of the global financial crisis. D.2	Key risks regarding the Issuer and the Guarantor	<p>There are certain factors that may affect the Issuer's ability to fulfil its obligations under the Securities issued under the Programme and the Guarantor's obligations under the Guarantee.</p> <p>The following is a summary of some of the additional investment considerations relating to the business of BP2F:</p> <p>(a) The primary credit protection for Securities issued by BP2F will derive from the guarantees given by BNPPF.</p> <p>(b) BP2F's ability to perform its obligations in respect of the structured return on structured securities may depend on the ability of its hedging counterparties to meet their obligations under any hedge.</p> <p>(c) BP2F's ability to make payments under the Securities may depend on the operating performance of those companies to which the proceeds of the Securities are lent.</p> <p>(d) The financial condition of the operating companies to which the proceeds of the Notes are lent may deteriorate and this may affect BP2F's ability to make payments under the Securities which it issues.</p> <p>(e) During deteriorating or challenging economic conditions BP2F may find it difficult to raise further finance.</p> <p>(f) Transfer pricing tax rules in Luxembourg generate additional costs, which may vary from time to time.</p>

Element	Title	
		<p>The following is a summary of some of the investment considerations relating to the business of BNPPF:</p> <ul style="list-style-type: none"> (a) Difficult market and economic conditions including, without limitation, concerns regarding the ability of certain countries in the eurozone to refinance their debt obligations, could in the future have a material adverse effect on the operating environment for financial institutions and hence on BNPPF's financial condition, results of operations and cost of risk. (b) Legislative action and regulatory measures taken in response to the global financial crisis may materially impact BNPPF and the financial and economic environment in which it operates. (c) BNPPF's access to and cost of funding could be adversely affected by a further deterioration of the euro zone sovereign debt crisis, worsening economic conditions, a ratings downgrade, increases in credit spreads or other factors. (d) The prolonged low interest rate environment carries inherent systemic risks. (e) The soundness and conduct of other financial institutions and market participants could adversely affect BNPPF. (f) BNPPF may incur significant losses on its trading and investment activities due to market fluctuations and volatility. (g) BNPPF may generate lower revenues from brokerage and other commission and fee-based businesses during market downturns. (h) BNPPF's hedging strategies may not prevent losses. (i) Significant interest rate changes could adversely affect BNPPF's revenues or profitability. (j) Protracted market declines can reduce liquidity in the markets, making it harder to sell assets and possibly leading to material losses.
